*Invest in Idaho's Future:
The Education of Professional-
Technical Graduates*

Invest In Idaho's Future

by contributing to the Idaho
Professional-Technical
Education Foundation

Mission

“The Foundation is a non-profit organization established to stimulate and promote Professional-Technical Education to meet the future needs of Idaho’s workforce”

History

The Foundation was established in 1982 as a non-profit, 501 (c)(3) corporation under the laws of the State of Idaho. IPTEF is a separate functioning entity organized for the sole purpose of stimulating and promoting quality Professional-Technical Education within the State of Idaho. Recognizing the need for a skilled workforce in the future, the Foundation provides, solicits, receives and administers scholarships, instructional equipment donations and works to provide training opportunities for instructors to keep current with changing technologies within their current fields. The Foundation is self-sustaining and relies entirely on individual and business/industry donations to provide supplemental funding to students and instructional personnel.

Goals

Foundation Goals include:

- Provide scholarships to instructors to update their technical and teaching skills
- Provide scholarships to students to participate in national conferences to demonstrate the skills and knowledge needed for their selected career fields
- Obtain and distribute equipment and donations from business/industry for program improvement
- To collaborate with other educational organizations that help students, teachers and programs
- Supplement programs and activities that are statewide

Why Individuals, Businesses/Industries Should Donate

- 1) The work place is constantly evolving. Training programs must be upgraded so that graduates are prepared for the technological challenges in their chosen career. Financial and equipment donations from industry help schools keep up with the constant changes.
- 2) Donations from individuals, businesses and industries are tax deductible.
- 3) The Foundation sponsors an Annual Legislative Luncheon that features student organization officers representing all Professional-Technical Education programs. Students share what they learn in their programs with legislators who provide funding for the training programs, and with Idaho business and industry representatives.
- 4) Contributors have the opportunity to designate how their contributions will be used.
- 5) Professional-Technical Program Graduates are the skilled workers needed by our changing world of work.

The Board of Directors and members of the Foundation are volunteers who have a dedication and commitment to the Foundation's mission.
